Available Individual Dissertation Project

- Capturing Dynamics of "My Citations" in Google Scholar
 - When the number of overall citations on an individual person's Google Scholar citation page goes up there is no indication about which of the publications listed on the site has caused the rise
 - The goal of this project is to create a web application that allows to capture the dynamics of the website and provides some statistics on those dynamics

User Stories

- Story Map (graphical two-dimensional product backlog)
 - As a <role> I want <goal/desire> so that <benefit>

Coursework

- You have learned all the skills it needs to do this coursework!
 - Start with your class diagram ...
