

PlanSIG 2006, Nottingham, UK
14th – 15th December 2006

Program Chair

Rong Qu, University of Nottingham, UK

Program Committee Members

Uwe Aickelin, University of Nottingham
Ruth Aylett, Herriot-Watt
Chris Beck, University of Toronto
Jacek Blazewicz, Poznan University of Technology
Ken Brown, University College Cork
Peter Brucker, Universität Osnabrück
Edmund Burke, University of Nottingham
Alex Coddington, University of Strathclyde
Maria Fox, University of Strathclyde
Jon Garibaldi, University of Nottingham
Tao Gong, City University, London
Tim Grant, University of Pretoria
Peter Jarvis, NASA Ames Research Center
Graham Kendall, University of Nottingham
Raymond Kwan, University of Leeds
Dario Landa-Silva, University of Nottingham
John Levine, University of Strathclyde
Derek Long, University of Strathclyde
Lee McCluskey, University of Huddersfield
Amnon Meisels, Ben-Gurion University
Barry McCollum, Queen's University Belfast
Natalio Krasnogor, University of Nottingham
Sanja Petrovic, University of Nottingham
Julie Porteous, University of Strathclyde
Patrick Prosser, University of Glasgow
Rong Qu, University of Nottingham
Sam Steel, University of Essex
Andrew Tuson, City University

Table of Content

Planning Full Papers

Using Learned Action Models in Execution Monitoring <i>Maria Fox, Jonathan Gough and Derek Long</i>	1
Generic Types and their Use in Improving the Quality of Search Heuristics <i>Andrew Coles and Amanda Smith</i>	9
Model Transfer for Markov Decision Tasks via Parameter Matching <i>Funlade T. Sunmola and Jeremy L. Wyatt</i>	17
Fast Trajectory Planning for Multiple Site Surveillance through Moving Obstacles and Wind <i>Michaël Soullignac and Patrick Taillibert</i>	25
Inefficiencies in Task Allocation for Multiagent Planning with Bilateral Deals <i>Mathijs deWeerd and Roman van der Krogt</i>	33
Motivations for MADbot: a Motivated and Goal Directed Robot <i>Alexandra Coddington</i>	39
Learning Macro-Actions Genetically from Plans <i>M.A. Hakim Newton, John Levine, Maria Fox, Derek Long</i>	47
Combining Constraint Based and Classical Formulations for Planning Domains <i>T.L. McCluskey and R.M. Simpson</i>	55
Simulating the use of Macro-Actions Through Action Reordering <i>Andrew Coles and Amanda Smith</i>	66
Planning in Probabilistic Domains using a Deterministic Numeric Planner <i>Sergio Jim´enez, Andrew Coles and Amanda Smith</i>	74

Scheduling Full Papers

Multi-period Production Setup-sequencing and Lot-sizing through ATSP Subtour Elimination and Patching <i>Alistair R. Clark, Reinaldo Morabito Neto and Eli A. V. Toso</i>	80
A Polynomial Algorithm for a Bi-criteria Cyclic Scheduling Problem <i>Olivier Marchetti and Alix Munier-Kordon</i>	88
Methods for Optimal Pedestrian Task Scheduling and Routing <i>Srihari Narasimhan and Hans-Joachim Bungartz</i>	97
Algorithms for Radiotherapy Treatment Booking <i>Sanja Petrovic, William Leung, Xueyan Song and Santhanam Sundar</i>	105
A New Bi-objective Approach using Clustering Tools to Solve the Multi-mode Resource Constraint Project Scheduling Problem <i>Sonda Elloumi, Philippe Fortemps, Jacques Teghem and Taïcir Loukil</i>	113

Planning & Scheduling Full Papers

Modelling Alternatives in Temporal Networks <i>Roman Barták, Ondřej Čepek and Pavel Surynek</i>	121
An Empirical Study of Planning and Scheduling Interactions in the Road Passenger Transportation Domain <i>Javier Murillo and Beatriz Lopez</i>	129
Using Constraint Programming to Model Complex Plans in an Integrated Approach for Planning and Scheduling <i>Antonio Garrido, Eva Onaind´ıa and Marlene Arangu</i>	137

Short Papers

Generating Dynamic Activity-Travel Schedules <i>Marlies Vanhulsel, Davy Janssens and Geert Wets</i>	145
Fuzzy Greedy Search and Job-Shop Problem <i>Kaveh Sheibani</i>	147
Towards Inducing HTN Domain Models from Examples <i>N.E. Richardson, T. L. McCluskey and M.M. West</i>	151
Evaluation of the University Course Timetabling Problem with the Linear Numberings Method <i>Patrick De Causmaecker, Peter Demeester and Greet Vanden Berghe</i>	154
